

Dear

Thank you for welcoming us into your classroom as your Four Winds volunteers. We really enjoy bringing these natural science lessons to the students each month. We hope you'll take a few minutes to give us some feedback about the program. We'd love your suggestions for what we can do to improve the learning opportunity for all these children.

Please return this form either to us or to _____, the Four Winds coordinator at our school.

What parts of the Four Winds Nature Program do these students most enjoy and talk about later?

Do you have specific suggestions for ways in which we might improve the Four Winds lessons for these students? What could be stronger?

What suggestions for improving classroom management would you like to share with us?

Do you feel adequately informed about each month's topic and schedule? How might we improve communications?

Any other ideas for how we can work together to improve this learning opportunity for children?
